

ISAC NEWTON J

Power BI Developer | MSBI Developer | BI Engineer

isacnewton3211@gmail.com | +91 6369876324 | Chennai, India | [linkedin.com/in/isacnewtonj](https://www.linkedin.com/in/isacnewtonj)

PROFESSIONAL SUMMARY

BI Developer with **3.8+ years of hands-on experience** delivering enterprise Business Intelligence solutions for the US Public Safety sector. Skilled across **Power BI and the MSBI stack**, including Power BI Desktop, Power Query, DAX, data modeling, Power BI Service, Power BI Report Server, SQL Server, SSIS, and SSAS. Experienced in building dashboards, semantic models, ETL pipelines, OLAP cubes, scheduled refresh solutions, and on-premises reporting platforms for Police and Fire Records Management Systems. Hands-on exposure to **Microsoft Fabric**, including Lakehouse, Fabric SQL Database, Dataflow Gen2, and KQL.

TECHNICAL SKILLS

Power BI: Power BI Desktop, Power BI Service, Power BI Report Server, Power Query (M), DAX, Data Modeling, Star Schema, Row-Level Security (RLS), On-Premises Data Gateway, Scheduled Refresh

Microsoft BI / Data Engineering: SQL Server, T-SQL, SSIS, SSAS, SSRS, ETL, Data Warehousing, OLAP Cubes, SQL Server Agent

Microsoft Fabric: Lakehouse, Fabric SQL Database, Dataflow Gen2, KQL, Power BI Integration

Data & Performance: Data Transformation, Query Folding, Data Cleansing, Incremental Loads, SQL/ETL Performance Optimization

Domain: Public Safety (US), Police RMS, Fire RMS, CAD, CRM, OLTP to DW Migration

Others: Microsoft TFS, Agile Scrum, Technical Documentation, Index Maintenance

PROFESSIONAL EXPERIENCE

ProPhoenix Consultancy Services Pvt. Ltd. | Chennai | Nov 2022 – Present

Senior Software Engineer – BI Developer

- Developed and maintained **enterprise BI solutions** for Police and Fire Records Management Systems, supporting operational analytics and business reporting requirements.
- Built end-to-end Power BI solutions using **Power BI Desktop, Power Query, DAX, and data modeling**, transforming SQL Server/SSAS data into interactive business dashboards.
- Designed optimized data models using relationships and **Star Schema** principles to improve report performance and maintainability.
- Created DAX measures and calculated columns for **KPIs, operational metrics, trends, and business calculations**.
- Developed interactive reports using **drill-throughs, bookmarks, buttons, slicers, dynamic KPIs, and report navigation**.
- Performed data transformation and cleansing using **Power Query (M)**, including filtering, merging, appending, data type handling, and query optimization.
- Managed **Power BI Service workspaces** published reports and semantic models, and configured role-based access to meet business requirements.
- Implemented **Row-Level Security (RLS)** and validated role-based report access for different user requirements.
- Configured **On-premises Data Gateway and gateway connections**, supporting daily scheduled refreshes and resolving refresh issues.
- Configured and supported **Power BI Report Server** for on-premises report publishing and enterprise report distribution.
- Integrated Power BI reporting with **Police RMS and Fire RMS** environments and connected reports with SQL Server and SSAS data sources.
- Architected and deployed **15 SSAS OLAP cubes** with KPIs, role-based security, and partitions, supporting 200+ users across 5+ US county public safety agencies.
- Engineered daily incremental **SSIS pipelines** and optimized SQL Server/ETL processing, reducing average ETL processing time by **40%**.
- Developed proof-of-concept solutions using Microsoft Fabric Lakehouse, Fabric SQL Database, Dataflow Gen2, and Power BI integration to understand modern data analytics and reporting architectures.
- Participated in Agile Scrum ceremonies, technical documentation, troubleshooting, production support, and BI solution enhancements.

KEY PROJECTS

Police RMS & EZ Fire Records Analytics Platform | Nov 2022 – Present

Role: Senior Power BI & MSBI Developer

Client: Multiple Police Departments & Fire Agencies, United States

Technologies: Power BI Desktop, Power BI Service, Power BI Report Server, Power Query (M), DAX, SQL Server, SSIS, SSAS, Data Warehousing, T-SQL

Designed and delivered an enterprise Business Intelligence platform for US public safety agencies, providing operational and executive analytics for Police and Fire Records Management Systems. The platform centralized reporting across jurisdictions, enabling analysis of incidents, arrests, bookings, crashes, investigations, fire inspections, EMS activities, and NFIRS reporting.

Key Contributions:

- Developed interactive Power BI dashboards and reports using Power Query, DAX, KPIs, drill-through, bookmarks, slicers, and advanced navigation features for operational and executive analytics.
- Designed scalable Star Schema data models and semantic layers to improve reporting performance, maintainability, and business metric consistency.
- Built complex DAX measures and defined business metrics supporting operational, tactical, and executive-level reporting.
- Administered Power BI Service environments, including workspace management, report deployment, semantic models, gateway configuration, scheduled refreshes, and role-based access.
- Implemented Row-Level Security (RLS) and role-based access controls to secure reports across multiple agencies and departments.
- Configured and maintained Power BI Report Server for enterprise on-premises reporting and distribution requirements.
- Integrated Power BI solutions with Police RMS and Fire RMS applications using SQL Server and SSAS data sources.
- Architected centralized data warehouse solutions supporting 8+ analytical reporting workloads across Police RMS, Fire RMS, EMS, inspections, and NFIRS domains.
- Delivered 25+ SSAS OLAP cubes covering Police RMS and Fire/NFIRS modules with KPIs, partitions, aggregations, and role-based security.
- Optimized SSIS ETL pipelines and SQL Server processing, reducing average data processing time by over 40% and supporting 200+ users across 5+ US county public safety agencies.

EDUCATION

B. Tech – Information Technology | CGPA: 7.0

Christian Engineering College, Anna University | 2018 - 2022

ACHIEVEMENTS

- Awarded **Quarterly Best Performer** at ProPhoenix Consultancy Services for outstanding contributions to enterprise BI solutions.
- Designed and developed AI-assisted PowerShell-based Windows Forms automation utilities for Power BI Service and Power BI Report Server, automating report publishing, workspace provisioning, data source and credential configuration, server/database configuration updates, and refresh scheduling.
- Improved customer onboarding efficiency by reducing end-to-end Power BI deployment time from more than 2 days to under 30 minutes, enabling rapid deployment of 45+ standardized reports across 300+ customer environments.
- Runner-up in the Chess Competition at ProPhoenix Annual Day.
